Played it back on Xbox when it first released in 2004. Glad to see it on Steam. Works well on modern systems, plays well (although a couple of things are a bit dated compared to modern shooters, but more part of the charm than anything that prevents you playing the game).

Definitely one of the best single player Vietnam War experiences out there. Excellent music in the game as well. If you like that era, heck if you just like fun shooters in general, you should seriously consider this. Watch some gameplay videos, have a bit of a think, and if you like it give it a buy. Can't complain with the price either.. Quite enjoyable game if you don't mind the lack of graphics! I'd give it a solid 7.5/10

Play if you need to kill some time :). Easy unlock 5000 Achievements 100%!

. I collect paint programmes as a hobby just as much as I love drawing. I have been collecting them for many many years. Black Ink may not seem too new to me because of that, but it is a beautiful programme to have in my collection. It has a fantastic streamline UI and everything runs very smoothly. Works perfect with my pen pressure of my CTH-470 and supports the eraser function on the pen too.

The only downside is, from first opening, the brushes seem quite limited. However, you can play with the settings and change that on your own. Many paint programmes also come with communities who create their own brush packs, so keep an eye out for any generous, creative folks...

EDIT: A while ago, I went snooping the forums for Black Ink and discovered a wide range of fan made brushes for importing into the program, much like how most paint programmes do this now. You can still make things on your own in programme, but the community is bursting with fantastic creativity and it's very generous for sharing it. I am very happy to find this, and it opens so many new options!. Terrific game,except half way through the trail it says "Failed to initialize engine
',then wont play.Have looked everywhere for help,many folks battling with this problem.. I enjoyed this expansion a bit more than the base game, as I'm more into trains than cars\/trucks. It's basically the same as the base game, but you have to build bridges for trains. So if you enjoyed the base game, you'll probably enjoy this add-on too.

Actual review is coming soon. Squandered... it doesnt work. Amazing game, simple and addictive. 5 stars. Perfectly executed. Please bring back community skins and possibly an update with a revamp!. Not a serious FPS game, go in and try, THAT'S IT! The overall gameplay is not OK, felt like TF2's atmosphere though but the aiming and the movements aren't quite good. The weapons are OK, only 4 exist and for me the sniper was so bad. The graphics are lowly rendered but it's the theme, and the animations are bad.. soooo cool when will full game come out . I bought the Nyx and I adore it. I got it on sale though, I personally wouldn't have paid full price for it, although the one month free premium is a steal.

it's very fast and powerful, though it IS a Spec Ops class (rank 9 with Jericho), it's much more powerful than my more armored gunships\/commands from lower tiers.

So yes, I recommend it if you want a reliable ship. Of course remember it costs galactic standards (premium currency), to transfer synergy off of it. It makes a very good syngery farm if you don't mind spending GS to transfer (you get plenty from achievements, but more are purchaseable)
